WHERE I LIVE
Brazil - São Paulo

MY GOAL

To join a team where I can collaborate and grow, starting as a Junior or Full Developer.

TECHNOLOGIES

FRONT-END
HTML, CSS (Responsive Design), Javascript/ES6, Typescript, React, Angular, Bootstrap, API Rest and Git.

BACK-END
Node, AdonisJS, NestJS, GraphQL.

BANCO DE DADOS
MySQL and NoSQL.

CLOUD (APRIMORANDO)
AWS, Google Cloud and Docker.

MICROSERVIÇOS (APRIMORANDO)
MySQL and NoSQL.

DEVELOPER EXPERIENCE
FULL STACK DEVELOPER

During 9 months I had the opportunity to work in a Consulting company (Software House) for Software on Demand projects.

The richest part of this experience was the opportunity to work with a complex system for a client with a Franchise business model.

The sprints were well adjusted, so I learned to work under pressure.

The testing was done together with the PO. Responsible for the CI/CD of the application.

TECHNOLOGIES USED

-Development of Rest API with Node Js (using Adonis JS as Framework).

-Use of React Js to create the Front-End (with CSS, Material UI and Styled Components)

-Using Context API and Hooks for the Application State Control.

-Use of React Native to create the App (Sales Application, which was integrated with the previously developed Inventory Management System).

-MySQL Database.

Who Am I?

EDUCATION AND LANGUAGES

Studying the Third Semester (3/6) of the Systems
Analysis and Development course at FATEC
Sorocaba, where I have been studying:
  Database
  C language (and Data structure)
  C#
  Software Engineering

-Advanced English;

YOUTUBE CHANNEL

I always liked to express myself and record videos.
My first "successful" channel was when I was 12
years old; I used to record computer tutorials, but I
abandoned it after a while.

After a few years, when I started programming, I
took up this hobby again. I knew I would learn
many concepts. So sharing what I learn also helps
me to organize my ideas.

I really enjoy having the feeling of helping others,
through incentives and words of support; so,
through my Youtube channel (Gui Dev), I share my
experiences and knowledge related to the
programming world.

This makes me feel like an even more complete
professional.

The feeling of contributing to the community is very
satisfying.

SOURCE OF DISCIPLINE AND FOCUS

If my communication is getting better and better
due to my exposure on Youtube, on the other hand
my discipline and focus are conquered through my
passion for bodybuilding, an activity that keeps my
health up to date, and makes me more aligned to
my goals.

MY FIRST SUCCESSFUL STARTUP

At the age of 19, I started my startup within the
Digital Marketing industry (Dreamverse). Yes, I left
this goal aside, to follow my path in the
programming world. But during 2 years, I had great
learnings.

I built this dream together with my sister (we were
partners). So we worked together in Infoproducts
projects (Launching Online Courses). Basically, we
provided services for content creators.

Throughout this 2-year journey, we dealt with
client, negotiation, organization, processes,
students, copywriting, marketing, among other
various skills!
